✅ Open to Relocate

PROFESSIONAL SUMMARY

Skilled Full-Stack Developer and DevOps Engineer with 6+ years in production systems, specialising in Flutter, JavaScript, Python, .NET, C++, Rust, and Spring Boot microservices. Achieved a 99.9% SLA, over 85% test automation, and enhanced CI/CD by 40%. Aiming to deliver expertise and leadership to cutting-edge companies. Eligible to work in the EU/EEA with an Opportunity Card.

WORK EXPERIENCE

Content Management System Developer, **Contabo** 12/2025 – 04/2026 | Ingolstadt, Germany

- Built a production-grade headless CMS on Ubuntu VPS supporting 300+ concurrent users with 95% uptime and zero data loss incidents.
- Designed PostgreSQL schema with automated backup routines, cutting DBA intervention by 90% and recovery time from hours to minutes.
- Enforced RBAC across 4 content teams with SOC-aligned authentication and access governance.
- Tech: **PostgreSQL, Ubuntu VPS, RBAC, SOC Compliance, Bash, Linux, Kubernetes, Docker, Payload**

Project Manager, **AnnexTech Software** 07/2022 – 04/2025 | Gujarat, India

- Led development of a Flutter + Spring Boot platform serving 10,000+ users at 99.9% uptime with 50,000+ daily API calls and zero P1 incidents.
- Architected RESTful and gRPC microservices with JWT/OAuth2, OpenAPI 3.0, and circuit-breaker patterns across 3 years in production.
- Built an observability pipeline from Crashlytics to Prometheus to Grafana, enabling real-time triage and cutting MTTR by 45%.
- Engineered a multi-layer test suite achieving 85%+ coverage, blocking 60% of regressions before staging.
- Optimised GitHub Actions CI/CD with intelligent caching, delivering 40% faster builds and same-day production releases.
- Mentored 3 junior engineers via pair programming, raising team-wide PR first-pass rate to 98%.
- Tech: **Flutter, Dart, BLoC, Java, Spring Boot, gRPC, REST API, JWT, OAuth2, OpenAPI 3.0, Prometheus, Grafana, Crashlytics, Jira, Postman, GitHub Actions, CI/CD, JUnit, RestAssured, fluttertest, bloctest, Android Studio, VS Code, Debugging.**

Software Developer, **WeeTech Solutions** 07/2019 – 06/2022 | Gujarat, India

- Developed and managed robust .NET and Angular applications for both client-facing and internal platforms within Agile environments.
- Integrated third-party APIs and internal services to support cross-functional business workflows, improving SQL query performance by 40%.
- Achieved 65% code coverage through unit and integration testing, establishing a baseline quality standard for the team.
- Deployed and managed containerized applications across AWS, Azure, and GCP using Docker and Kubernetes.
- Conducted code reviews and knowledge-sharing sessions to support junior developer growth.
- Tech: **.NET, C#, Angular, React, Java, JUnit, Docker, Kubernetes, AWS, Azure, GCP, SQL, Agile, Scrum**

EDUCATION AND CERTIFICATES

Master of Engineering, **Technische Hochschule Ingolstadt** 03/2024 – 03/2026 | Ingolstadt, Deutschland Artificial Intelligence for Autonomous Systems (Incomplete)

Bachelor of Engineering, **Gujarat Technological University** Gujarat, India Computer Science and Engineering **Google Professional DevOps Engineer (04/2023), Google Cloud Big Data & Machine Learning (02/2025)**

AWARDS AND HONOURS

ROCKET DEVELOPMENT, S.N.P.I.T & R.C. 2021
Worked and researched missiles for increasing range and light weight for fuel efficiency, design, and durability.

MEDAL OF HONOUR, S.N.P.I.T&R.C. 2023
Final GPA: 1.7

SKILLS

Programming Languages: Java, Python, Dart, TypeScript, JavaScript, C++, C#, .NET, Rust, Go, SQL, PowerShell, Bash

Tools & Platforms: Git, GitHub, Jira, Postman, Android Studio, MATLAB, SAP, Figma, Agile, Scrum

AI & Machine Learning: Reinforcement Learning, Computer Vision, YOLO, CNN, NLP, Image Segmentation, Object Detection, LLM, Generative AI, NVIDIA Jetson Nano

Testing & QA: JUnit, RestAssured, flutter_test, bloc_test, TDD, Unit Testing, Integration Testing, 85% Code Coverage

Databases: PostgreSQL, SQLite, Firebase, NoSQL, RBAC, SOC Compliance, Automated Backup

DevOps & Cloud: Docker, Kubernetes, GitHub Actions, CI/CD, AWS, Azure, GCP, Prometheus, Grafana, Crashlytics, Linux

Backend & API Development: REST API, gRPC, JWT, OAuth2, OpenAPI 3.0, Microservices, Circuit Breaker, WebSocket

Frameworks & Libraries: Flutter, BLoC, Spring Boot, Angular, React, Node.js, TensorFlow, Keras, OpenCV, scikit-learn, OpenAI API

Soft Skills: Project Management, Project Leadership, Problem Solving, Decision Making, Results-Oriented Approach, Strategic Planning, Cooperative, Attention to Detail, Effective Communication, Collaboration, Adaptability in International Teams.

Languages: English: C1 (Fluent), **German:** A2 (Basic), **Hindi:** C2 (Native), **Gujarati:** C2 (Native)

PROJECTS

Portfolio Website, TypeScript, SQL, MCPServers, CSS, HTML 04/2026 – 05/2026

Implemented a responsive design, ensuring compatibility across devices and screen sizes. Utilised MCP Servers to manage server-side operations and automate deployment processes effectively.

AI Real-Time Multilingual Video Team Meetup, WebSocket, NLP, 10/2025 – 12/2025

Python, TypeScript, Node.js, REST API, Streaming Architecture

A real-time video collaboration platform enabling simultaneous cross-language conversations with near-zero translation latency.

Autonomous Navigation Agent, Python, Reinforcement Learning, 11/2024 – 01/2025

Reward Shaping, Simulation, TensorFlow, NVIDIA Jetson Nano

A reinforcement learning agent that perceives its environment and navigates autonomously toward defined goals in simulation.

Automated ERP Inventory & Resource Management System, 03/2025 – 07/2025

Flask, Python, Java, SQL, PostgreSQL, DBMS

Collaborated with a team to integrate existing ERP solutions with new automated features for increased efficiency.

PUBLICATIONS

A Deep Research on Heterogeneous High-Performance Computing, 2024

Vatsal Kishorkumar Maisuria

Authored peer-reviewed research examining performance trade-offs across multi-processor and GPU hardware combinations. Benchmarked compute throughput, memory bandwidth, and power efficiency, contributing practical guidance for HPC system design decisions. **C++, CUDA, GPU Computing, MATLAB, Multi-Processor Architecture, Performance Benchmarking**

Image Segmentation and Object Detection, 2022

Vatsal Kishorkumar Maisuria

Implemented pixel-wise image segmentation using cluster-based techniques, edge detection, and thresholding methods. Integrated object detection pipeline capable of identifying multiple objects with bounding boxes. Designed an FCN-based encoder-decoder model for semantic segmentation. **Python, YOLO, CNN, FCN, OpenCV, Flutter, Dart, Android SDK, Custom Dataset Labelling**
